### Education

### 04/2021 - present

# PhD (Astrophysics) – I. Physikalisches Institut, University of Cologne

Title: *The Genesis of Stars: From Giant Molecular Clouds to Star-Forming Cores* Research on the interstellar medium (ISM) and star-formation processes in the Milky Way and external galaxies, performing astrophysical data analysis, dust-dynamics and photodissociation-region (PDR) modeling, along with developing specialized analytical techniques, etc. Investigate atomic and molecular cloud formation and stellar feedback's impact on the ISM using [CII] data from NASA SOFIA's FEEDBACK program.

Led student tutorial sessions, designing problem sets, and grading assignments and exams.

(Advisors: Prof. Dr. Jürgen Stutzki, Dr. Nicola Schneider)

#### 2016 - 2019

## Physics (Master of Science) – Johannes Gutenberg-Universität Mainz

Title: Standard Model Effective Field Theory Effects in Dijet Events at Tevatron (Grade: 1,3)

Focus: Elementary Particle Physics, Quantum Field Theory

Minor: Meteorology (Atmospheric Hydrodynamics)

Parts of the results of my master thesis are published at the renowned peer-

review journal JHEP:

https://doi.org/10.1007/JHEP09(2019)086

#### 2011 - 2016

# Physics (Bachelor of Science) – Johannes Gutenberg-Universität Mainz

Title: Massenbestimmung steriler Neutrinos anhand von Supernovae

Minors: Mathematics und Informatics

#### 2010 - 2011

# Fachgebundene Hochschulreife (High School Diploma) – Berufsbildende Schule 1 Mainz

# **Employment**

#### 04/2021 - present

# Doctoral Researcher (Wissenschaftlicher Mitarbeiter) – I. Physikalisches Institut, University of Cologne

Research on the interstellar medium (ISM) and star-formation processes in the Milky Way and external galaxies, performing astrophysical data analysis, dust-dynamics and photodissociation-region (PDR) modeling, and developing specialized analytical techniques, etc.

Investigate atomic and molecular cloud formation and stellar feedback's impact on the ISM using [CII] data from NASA SOFIA's FEEDBACK program.

Led student tutorial sessions, designing problem sets, and grading assignments and exams.

#### 10/2019 - 03/2021

## Aktuar (Mathematiker) - HDI, Cologne

Developed and implemented the internal "Leben" mathematical model for Solvency II – compliant risk modeling of life insurance portfolios.

### 06/2019 - 09/2019

## Software Developer – Hottgenroth, Cologne

Developed software for building simulations focused on the physical parameters critical to energy-efficient buildings, particularly climate data.

## 06/2017 - 12/2018

# Software Development/-architecture (Werkstudent) – BioNTech, Mainz

Engineered software solutions and defined software architecture, overseeing project planning, documentation, and evaluating applications (with contact to U.S. teams).

Gained foundational project coordination experience by managing a focused software development initiative.

## 09/2014 - 12/2015

## Research Assistant – Institut für Physik, Mainz

Built acousto-optic modulator (AOM) driver systems for laser-based quantum physics experiments.

#### 06/2014 - 09/2014

# Research Assistant – Institut für Kernphysik, Mainz

IT-Administration for the Institute of Nuclear Physics.

08/2009 - 12/2009	License Management – T-Systems, Darmstadt
-------------------	---

Managed software licensing for mainframe computer systems.

09/2006 - 06/2009 Apprenticeship IT-Specialist (Berufsausbildung zum Fachinformatiker) – Deutsche Telekom, Mainz

Designed and developed software applications in C++.

## **Publications**

**NASA ADS Link** 

## Science/Research Presentations

09/2023 German Astronomical Society – Berlin (contributed talk)

FEEDBACK observations of RCW79

04/2024 Heritage of SOFIA – Scientific Highlights and Future

Perspectives, NASA/SOFIA Conference – Stuttgart (poster

presentation)

First Detection of the [CII] 158 µm Line in the Intermediate Velocity Cloud

Draco

07/2024 Research Group Prof. Walch-Gassner (seminar talk) –

**University of Cologne (invited talk)** 

M33 Molecular Cloud Matching

09/2024 German Astronomical Society – Cologne (contributed talk)

M33 Molecular Cloud Matching

01/2025 Science with the Atacama Pathfinder Experiment (APEX), Max-

Planck Conference – Ringberg (poster presentation)

Unveiling Star Formation in the Milky Way: SOFIA's legacy in Cygnus X

05/2025 Star Formation, Stellar Feedback, and the Ecology of Galaxies

Conference – Visegrad, Hungary (poster presentation)

Reassessing the [CII]-Deficit in RCW79

# **Observing Proposals**

#### Successful as PI

2022 APEX (18.6h)

[CI] Observations in the M33 Southern Arm

Project Code: #109.23FN

2024 APEX (17.7h)

An evolutionary tale of three interstellar bubbles

Project Code: #M9502A\_113

#### Successful as Co-PI

2025

2024 IRAM, 30m (25.4h)

The Diamond Ring in Cygnus X: Composition and Evolution of an unusual

ring in CII

Project Code: #P458622 PI: Simon Dannhauer

2025 IRAM, 30m (5.4h)

Molecular gas dynamic and conditions in a proplyd-like object in Cygnus X

Project Code: #P487526 PI: Dr. Nicola Schneider IRAM, NOEMA (12h)

Outflows and shocks in a proplyd in Cygnus

Project Code: #P484678 PI: Simon Dannhauer

# Associated Research Collaborations

SFB956 Conditions and Impact of Star Formation
SFB1601 Habitats of massive stars across cosmic time

FEEDBACK NASA FEEDBACK SOFIA Legacy

# Other

Strong abstract and analytical thinking with a problem-solving orientation, expertise in data science, strategic planning, and machine learning. Proficient in Python, C++, Mathematica, R (statistics), GILDAS, and ROOT (CERN).
